Network Configuration - Computer Maintenance & Support - Data Backup & Recovery - Video Conversion to DVD

VHS / S-VHS / VHS-C / MINI-DV / Hi-8 Transfer to DVD

R3 Consulting, LLC is pleased to announce the service of transferring/converting your old VHS, S-VHS, VHS-C, Mini-DV, or Hi-8 tapes to DVD. Our transfer process does not suffer from audio/video sync issues as is common in VHS transfers. In addition, the device we use has special filters to provide superior image quality.

Problems with VHS / S-VHS / VHS-C

- Quality deteriorates over time as well as each time it is played.
- You may not even have a VCR connected. Digital Video Recorders such as Comcast's DVR and TIVO are becoming more popular and replacing the old fashioned VCR.
- It is difficult to know what is on the tape. In addition, you must fast forward and/or rewind to get to a specific scene, which in turn causes the tape to deteriorate.
- VHS-C requires an adaptor to convert it to your VCR player.

Problems with Mini-DV / Hi-8

- Unless you have an expensive standalone Mini-DV or HI-8 player, you must connect your Mini-DV/Hi-8 camcorder to your TV in order to watch it.
- This is still on digital tape, which has the tendency to break.

Benefits of Converting to DVD

- Can hold approximately 2-4 hours of video (90 minutes recommended for best quality) on 1 DVD.
- Menu and sub-menu system available for easy navigation.
- Chapter points can be added to quickly skip through different scenes.
- DVD playback will not deteriorate.
- You can copy your DVD unlimited times easily with your own DVD burner.
- R3 designs a custom DVD Front and Back Cover.
- Hi Quality Inkjet Printable DVD Media.

If you are interested in this service, please contact me at 856-354-0252 or via email at Rob@R3-Consulting.net for a custom quote. Please note that not all older DVD players can play DVD-R or DVD+R burned media.
